

Intermediate Software Developer/Analyst

Kinsol is looking for a technically oriented programmer to join our development team. Successful applicants will work on one or more software research projects based on their skills and interests. The ideal candidate will be a driven team player who takes ownership of their work, collaborates effectively, and champions ideas from whiteboard to production.

Key Abilities

- Must be able to produce high-quality code, with an eye for testing and design
- Must be able to communicate clearly, both orally and in writing
- Must be self-motivated and able to work as part of a team

Qualifications

- Degree in Computer Science, Software Engineering or equivalent
- Minimum of 3 years professional experience
- Software development experience, with one or more relevant languages (Python, JavaScript, TypeScript, C/C++, Go), Python is preferred
- Experience developing and deploying in cloud environments (GCP, AWS)
- Ability to design large-scale data systems targeted towards high-volume data processing and storage
- Experience with databases (PostgreSQL, MySQL, MongoDB, Redis, CouchDB, BigQuery)
- Familiar with modular development, object-oriented concepts, version control, documentation and unit tests
- An understanding of client/server architecture and software design patterns (MVC, microservices, event-driven architecture)
- Ability to operate Linux servers in a remote terminal environment

Additional Assets

- Experience with the theory and application in any of the following areas: digital signal processing (DSP), probabilistic reasoning, machine learning (ML), audio, natural language processing (NLP), computer vision (CV)
- Experience server-side frameworks (Flask, FastAPI)
- Experience building distributed systems
- Experience with agile development and collaborative software practices
- Experience with Docker containers and continuous integration
- Experience with message brokers (RabbitMQ, ZeroMQ, Redis, Kafka)
- Experience with python libraries such as NumPy, Pandas, Polars, Scikit-learn, Tensorflow
- Experience managing Kubernetes clusters and writing/deploying Helm charts
- Experience with infrastructure-as-code
- Front-end experience (JavaScript, CSS, HTML5, React)

KINSOL

KINSOL Research Inc.

951 Alston Street Victoria BC Canada V9A 3S5
